IRIS Payroll Professional

IRIS Payroll Professional Bureau Management Software

On-site Training

"I would not hesitate to recommend IRIS Payroll Professional's Bureau Management Software to any provider of payroll services. The IRIS Payroll Professional team's dynamic approach to payroll management has allowed us to streamline our traditional processes, keep a tighter rein on daily activities, gain valuable time to work with additional clients, and ultimately, increased profitability."

— Julie Mason, Payroll Services Manager,
PM+M Solutions for Business

When PM+M realised that its manually-run bureau service was becoming outdated and inefficient, it turned to IRIS Payroll Professional Bureau Management Software.

With a rising number of clients amid a landscape of growing legislative complexity, the payroll team at PM+M made the decision to move operations to an updated software system in a bid to improve efficiency, organisation, and communication.

By implementing IRIS Payroll Professional's Bureau Management Software (BMS), PM+M did exactly that. As a leading chartered accountancy and advisory practice, PM+M acknowledged that there was significant room for operations to be streamlined. Having assessed a number of different software packages to assist with the company's payroll service offering, PM+M decided that the IRIS Payroll Professional team's deep understanding of the payroll bureau market indicated that their software would be the most compelling option.

Today, the firm's payroll team adopts a complete paperless approach to their work, noting that IRIS Payroll Professional's BMS has helped to align working methods and free valuable time, enabling them to work with and add significant value for even more clients.

For Julie Mason, PM+M's Payroll Services Manager, the move to IRIS Payroll Professional's BMS has changed the face of the firm's payroll process for good. She comments, "Payroll was once perceived as a simple add-on service to accountancy. It is now a fullblown, important service and there are so many deadlines and added pressures. IRIS Payroll Professional's BMS has helped us to manage our deadlines in a better way, ensuring that we maintain a quick turnaround on work and keep client satisfaction to a high standard."

Julie says, "Having worked with the IRIS Payroll Professional team in the past, I was confident in their ability to provide a unique and transformative billing system for PM+M, and was reassured that their support team would continue to be responsive and hardworking, as well as endeavouring to solve any problems we had. Over time, we moved all 400 plus of our client accounts to the BMS system, meaning that all workflow can now be managed on a single portal. I'm now able to keep track of which team members are working on certain projects, and have been given the ability to allocate and transfer work electronically across my team."

She adds, "IRIS Payroll Professional Bureau Management Software is one of the best solutions that I have seen. For a payroll bureau I think it's perfect."
