IRIS Payroll Professional myePayWindow

Self-service and beyond

In today's always-on business environment, employee payroll service providers require an almost impeccable level of collaboration between themselves, employers, and their payroll teams to keep everything running smoothly. myePayWindow is the payroll services portal that enables all involved to simply and securely exchange documents and deliver payroll information to employers and their employees, every single payroll cycle.

Payroll service providers

A platform that's easy to set-up, simple to maintain and ensures high quality payroll service delivery – and the facility for a full or part managed payroll self-service portal for your clients.

Employers

See employee payslips (current and historical), P60s, P11Ds, P45s and documents, whilst still being able to manage employee status and securely exchange documents with your payroll service provider.

Employees & sub-contractors

A complete overview of current and historical pay data, including payslips, CIS statements, P60s, P11Ds, P45s and pension communications.

Simple, secure sign-up

Invitation emails are initiated in bulk, allowing users to register from their preferred device - computer, tablet or mobile. Employees and employers fully self-serve, view and download payroll information and receive notifications when new information is ready to view.

Personalised payroll

Customise the myePayWindow portal to your corporate colours and logos promoting your brand not your software vendor.

myePayWindow is the payroll services portal that enables all involved to simply and securely exchange documents and deliver payroll information to employers and their employees, every single payroll cycle.

Bank level security

Personal data is at the heart of any payroll service provision, which is why myePayWindow is built with data security and GDPR compliance throughout its core.

- > All data is encrypted during transmission and again once delivered to myePayWindow
- > User accounts enforce strong passwords and option of two factor authentication for added protection
- > Automatic data deletion routines ensure personal data and documents are not held longer than necessary and comply with GDPR regulations
- > All actions are audited and traceable by individual user

Employee benefits

- > Employees create their own username, password and update personal information without additional assistance
- > Two factor authentication for additional security
- > View and download current and historical payslips and other data
- > Receive notifications via their account and by email when new information is ready to be reviewed.

Employer benefits

- > Payslips and other pay data delivered directly to individual employee accounts
- > Access and exchange reports with the payroll team directly via myePayWindow and receive notifications in your account
- > Enforce additional login security to comply with corporate data security policies with two step authentication

Our support specialists boast a top class NPS Score of 70, and are easily accessible by phone, email, or support portal.

In-depth data analysis

Analyse data relating to the employees and clients you pay. Employer or payroll service provider users can query data graphically by month or see trends over multiple months.
