

IRIS Elements gets a great reaction from PY Accountants Ltd

If saving time on compliance, increasing productivity, spending more time advising clients and growing your practice are important to you, then IRIS Elements is the innovative cloud accounting solution to meet that challenge.

For Yorkshire based PY Accountants Ltd, finding a more cost-effective solution, which was easy enough to use, and accessible from anywhere, is what brought Elements into the practice. In fact, Paul Younger, Director of PY Accountants, was one of the first customers to use IRIS Elements, and his experience so far has been fantastic!

Paul told us, "I'm not someone who likes change, and I often choose to stick to what I know, but with rising costs I knew I needed to at least consider what other software was out there and I saw some really great things being said online and in forums about IRIS Elements. With it being a new product, I really didn't know anything about it, but I knew IRIS and I trusted what was being said by other accountants, so I decided to go for it."

Working with 125-150 clients focusing mainly on tax returns and accounts preparation, Paul needed software that was accessible and intuitive.

He said, "Since Covid, everything has become more digital, and it's very rare I see any of my clients face to face now. Having software I can access anywhere is great, because it means I can speak to my clients when I'm on the go, and even if needed, help them whilst on holiday!"

"Though Elements is laid out differently to the previous system I was on, it's been pretty easy for me to pick up and I've been able to submit tax returns with ease. I'm looking forward to using more of the applications available in IRIS Elements going forward, I think that integration will be a huge bonus."

From attracting new clients to onboarding them safely, filing tax returns to preparing accounts and managing workflows, IRIS Elements has everything you need, all under one roof.

Delivering simple, scalable, secure cloud accounting, IRIS Elements helps you manage your work whilst supporting your work-life balance, letting you operate from anywhere, on any device.
