

CDA Accountancy says goodbye to connectivity issues thanks to IRIS Anywhere

Customer Story

CDA Accountancy is a practice based in Northamptonshire, that has been running since 2013 and has been an IRIS Customer for 11 years.

- Loading times and connectivity issues are a thing of the past thanks to IRIS Anywhere
- 24/7 cloud-based access
- Enhanced, high-level security measures to keep CDA Accountancy, and their customers, safe

Previously using IRIS Accountancy Suite and IRIS Bunker, the team at CDA Accountancy was experiencing speed and connectivity issues, which was a real challenge with the hybrid working environments they offered to staff.

Earlier this year, they migrated from IRIS Bunker to IRIS Anywhere, and have been thrilled with the change, seeing a noticeable increase in productivity across the team.

Charlotte Bryden, FCCA Accountant at CDA Accountancy, tells us,

“We’re a team of five working with 300 clients, and have been using IRIS Software for the last 11 years.”

“In the last few years, in particular, we were experiencing constant network disconnections and speed issues, and during busy periods, this was particularly challenging. Our account manager at IRIS told us about IRIS Anywhere, and because I’ve had bad experiences with software migrations in the past, I’ll admit the idea of moving made me feel anxious. However, I had confidence in our account manager and IRIS Anywhere seemed great, so we decided to go for it.”

//

"We also had the support from the team at IRIS who assured us they would be with us through the migration process, and they were. As a result, the migration went incredibly smoothly and we are so happy we made the move."

A cloud hosting service that supports hybrid working

With more teams embracing the benefits of flexible and remote working, accountancy firms need a secure, integrated, and high-performing solution to maintain productivity.

IRIS Anywhere is the complete package for accountancy firms that want to offer their people flexibility and freedom, allowing them to work seamlessly by accessing their desktops from anywhere with an internet connection.

"We can now use software that we previously had to run on our local machines on the hosted environment which is more efficient for us as a business. The productivity of the whole business has improved since we moved onto IRIS Anywhere, and the speed in terms of loading times has been very noticeable."
