Customer Story

In the dynamic landscape of business growth, selecting the right payroll software becomes a pivotal decision that can shape the trajectory of success. With the right solution, payroll can be compliant, error-free, and smooth to process.

With the business growing from 6 people to 100 people in the first year, the team at Upp identified the critical importance of finding the perfect payroll provider to support the next phase of growth. They needed a system that could navigate the challenges of scalability and agility with seamless business operations management during periods of accelerated growth.

"

Can your software keep Upp?

Upp needed a payroll system that was cloud-based, agile and fit for purpose – and when the previous provider could no longer cope, Staffology Payroll became the obvious choice. Now with 180 colleagues, Upp has been delighted with the move.

Peter Cannan, Special Projects – Finance, says, *"Our previous payroll system worked well when we were a very small team, but as we grew it became slow and the process itself was time-consuming. We had to notify our provider each month and it took five days to get a report back; if we spotted an error, we had to manually process those with our payroll provider, making it a time-consuming process. It was clear that as we grew, this was no longer a viable option.*

Peter Cannan,
Special Projects - Finance

"

"There were some key basics to our selection: the solution needed to be cloud-based, easy to use and sit within our budgets. Selecting Staffology met all our requirements and more, in fact, we were surprised at the number of features included against the cost which outstripped our previous supplier.

"We were delighted to receive a system that was intuitive, user-friendly and cost-effective. One of the biggest benefits for us was that we could get on and use it and didn't have to wait several days for someone at the other end to process anything."

"

Payroll management that exceeds expectations

Staffology's payroll software is accurate, secure, compliant and keeps up to date with changing legislation. Customers benefit from a more cost-effective, efficient payroll solution designed to take care of admin so they can focus on their business.

Peter concludes, *"Of all the software we've used in the last two years, I would say Staffology payroll has exceeded all our expectations. The team at IRIS is investing in the product and enhancements have been added in the time we've been using it. I think it's fantastic value for money and a payroll system I would highly recommend."*
